Gary,

On the resample of the one vac box that had NT8 added to it are you interested in pulling a sample for TCL VOC's only to prove if we are below 500 ppm for VOC's which would allow us to solidify at Robstown? I can't guarantee you will be below 500 ppm just wanted to check and see if you were interested in trying. Otherwise we can just punt and go to Veolia. Now this is assuming you still want to ship it as haz since we know NT8 was haz for D018. Let me know your thoughts please.

Thanks,

Beth Crawford
